## **Bisan Enterprise® | NGO Lite Edition**

*For small and medium size institutions Bisan Enterprise NGO Lite Edition is the Ultimate cost effective solution for managing financial data accounting, revenues and expenditures allocation and tracking a per project, or cost center.*

For small and medium institutions Bisan Enterprise NGO Lite Edition is the Ultimate cost effective solution for managing financial data accounting, revenues and expenditures allocation and tracking per project, or cost center

## General Features

---

- **Drill Down Functionality:** A complete drill down functionality showing all details on each transaction on every report.
- **Filtering Capabilities:** Capability to filter tables by excluding or including any criteria.
- **Advanced Search Functionality:** A unique enormously detailed search mechanism which enables search in any given database regardless of its size by searching through keywords or any other requested field. The search utilizes soundex algorithm that is especially handy for Arabic keyword searches.
- **Multi Lingual System:** A unique multi lingual implementation providing the user the option to switch between desired languages at any giving time during a session. An enhanced capability that allows entering vouchers in a certain language, and printing in another.
- **Data Export to HTML, Excel, Word:** Bisan Enterprise is capable of exporting all the generated reports to HTML files which can be opened by Excel or any other spread sheet or word processing software.
- **User Friendly:** The system provides user friendly menus and graphics, a capability to hide, show and move columns around to customize screens per user.

The menus and windows are designed in groups that deal with different cycles of accounting and management titles.

The system provides consistent use of function keys and icons that are defined clearly on the menu bars. Immediate error checking and warnings are provided throughout the system.

The System allows the user to open different menus and tables at the same time, to add new records, and modify existing ones without having to interrupt the transaction you are working with.
- **Record Cloning:** To accelerate the data entry transactions saving time and effort included you can clone any record available weather a file or a voucher providing a powerful feature for using any available voucher as a template rather than building a separate template per voucher.

- **Multiple Year Reporting:** A full reporting capability per different periods and years allowing for multiple years reporting, overlapping years and cumulative periods.
- **Integration:** The package is fully integrated where all the data is entered through conventional vouchers entered directly on the screen. The system will eliminate the use of

all paper work whereby all transactions are entered once and automatically posted to corresponding accounts and files.

- **Segmented Accounts:** For ease of use one segment is defined in the NGO Lite Edition.

## Financial Management

---

- **General Ledger:** A flexible chart of accounts with multilevel file structure, capturing all vouchers & financial transactions providing flexible reporting capabilities for any specified period of time with detailed information, and drill down functionality. A single entry voucher system, fully integrated to maintain all of your financial entries in an accounting ledger.
- **Accounts Receivable/Accounts Payable:** Full real time integrated module with the GL, multi-currency accounts management with consolidated reports for easy accurate comprehensive view for all customers and vendors balances in addition to detailed transactions, with full analysis of your customers' and suppliers activities such as aging, periodic collections, and maximum credit reports.
- **Full Banking & Check Management:** Management for multiple bank accounts and multiple currencies, full management and tracking for received and issued checks & bank transfers with full details including due dates and endorsed checks, providing an easy automated bank

reconciliation processing and providing a cash flow forecast for each bank account.

- **Automatic Depreciation Calculations:** Fully integrated with financial reports providing detailed depreciation schedules per asset or group of assets at any period of time with management of assets, new, additions, and discarding. In addition to providing detailed managerial reports for assets related expenses.
- **Financial Statements** (Income Statement, Balance Sheet & Cash Flow Reports): Comprehensive Financial reports for any period of time including (DD-MM-YY TO DD-MM-YY), giving flexibility for cross period and multiyear reporting, in addition to providing currency translation for extracting the reports in any desired currency defined in the system.

- **Multi-Level File Structure:** Providing grouping on any set of files whether, General ledger accounts, A/R, A/P, assets, cost centers to simplify data entry and provide flexible comprehensive reporting options.
- **Multi-Currency Management:** Full Multi currency management with user defined currencies and currency Rates tracking, ability to use multiple currencies per

voucher, with automated currency conversion & currency variance calculations vouchers allowing the management of as many currencies as needed, keeping track of account balances, statements and financial reports in the standard currency as well as any other defined currency. The system provides a multi-currency reporting and value translation for all available reports in the system

## Configuration & Setup

---

- **Access Right/Security:** Users are organized in a tree fashion similar to that of the company's administrative tree, and each user can be assigned specific access rights on any option, module, and functionality on the system.
- **Advanced Security:** An all-inclusive security features that only permits authorized users' access in permissible, fields, and sub-fields. By defining criteria and rules per voucher or record field providing a high level of user access control.
- **Station Login Security:** Besides the user name and passwords an additional user defined security option for permitting specific stations to access the system this feature is extremely useful for online access.
- **Document Printing Setup:** User defined document printing options and assigning desired signatures (approvals) for hard copies per voucher based on criteria's

and rules for fields such as voucher amount, Branch, department, supplier.

- **Control Dates:** User defined set of controls for data entry security and control, such as maximum and minimum allowed document dates from system date. Per bank account lock date for reconciled bank statement. Data entries lock date for last audited or reporting period. This controls guarantees unintentional data entry that will affect audited or submitted reports.
- **Internet Enabled:** The system is fully written in the Java programming language which is the internet standard. It fully supports internet/intranet functions such as web publishing of reports; online multiple locations accounting, as well as business to business and business to customer interface. The system is platform independent with standard SQL Database.
